SPM 3.0:

The original suction  
pump massage for  
the whole body

THE  
NATURAL  
LIFTING

# THE WEYERGANS PATH

How we became  
what we are:  
HIGH CARE®  
Professionals

The original suction pump massage (SPM) from Weyergans is the reinterpretation of cupping which is known in different cultures for more than 5000 years. The idea of the healers of antiquity was to create a vacuum in the vessels

and lymph with the help of heated objects. This should encourage the circulation of the body fluids and the elimination of harmful substances.

We got inspired by this alternative medicine method and expanded and optimized the treatment by the most modern

application technology which effects were proved more than a thousand times.

Today the SPM is one of the most popular treatments against cellulite.

For over 30 years Weyergans stands for inventiveness in the field of medical cosmetics. Whether devices, products or their often combined

application - many therapies were found by Weyergans and are still exclusive to this day. Since the founding of the company, innovations from Weyergans are characterized by its practice and customer-orientation and a continuous improvement in terms of functionality and user-friendliness. HIGH CARE® through high tech.

Particularly innovative operators\* of cosmetic institutes are focusing on our dynamic family business right from the beginning. That brings us - as a matter of course as beauty technicians - to our second hallmark which is the Weyergans family. That doesn't include only those whose name is Weyergans, but especially who lives Weyergans: our employees, distributors, partners, suppliers, users and customers.

Going the Weyergans path means to respect and benefit from the diversity and the knowledge of all members of this family. This leads to the creative atmosphere for solutions which help to alleviate the suffering of many people who are burdened by skin damages.

#### GUT BOISDORF: PLACE FULL OF ENERGY

The source of inspiration: Gut Boisdorf near Dueren. The historic property is family home and company headquarters, research, and training center in one. This is where nature and modernity combine to form an unmistakable spirit and a timeless corporate identity. It is our compass even in times of generation change and digitization. Through them we can be relevant as a brand - regardless of any developments and trends.

Weyergans has a deeper effect. We not only help people to find back their beauty. The successful healing of the skin is closely related to the successful overcoming of a suffering of the soul. And that's ours actual, holistic goal.

# SPM 3.0:

How our newest version of a traditional treatment method creates real “wow effects” for the skin.

The original suction pump massage works under the skin. The SPM 3.0 achieves also deeper layers of the skin and activates the circulation in vessels and lymph with targeted negative pressure.

As a beautician you are working for the first time not just on the skin, but with your customer's skin. But actually the

suction effect of the SPM 3.0 works for you. With the controlled force and its eightfold suction gun set, your treatment options range from „fine” around the eyes to „extensive” in the thigh area and on the buttocks.

Depending on the application and region the negative pressure can be set from gentle to powerful right on the suction guns. The stimulation can be evenly or pulsating.

In any case, you work ambidextrously flexible and relaxed.

## APPLICATION AREAS

The modern SPM combines 5000 years experience of cupping and medical massage with operating comfort and the application possibilities of a smart technology.

Intensive lymphatic drainage on the face, bust, arms and legs as well as on the buttocks? Stimulation of the skin metabolism and regeneration of the whole structure from deeply within? Increase of fat burning? Everything is possible. Simply follow the program of your SPM 3.0! Make SPM your new standard against wrinkles on the face and on the forehead, neck and décolleté. Even for lachrymal sacks, drooping eyelids, couperose, acne-like or scarred skin the SPM 3.0 provides relief right away. With an SPM you regulate the lymph flow in arms and legs. And with the extra breast and bottom shells you add volume even to bust and buttocks.

## CUSTOMER OPINIONS

Liftings and sculptings guided by the SPM 3.0 bring your customers back in shape. This is doing just the right thing for body and soul. Our surveys show: Anyone who has ever enjoyed an SPM doesn't want to miss them anymore! The ladies love how their tired and slack skin blooms again in a short time. And colleagues love the relaxed way to work with the SPM 3.0.

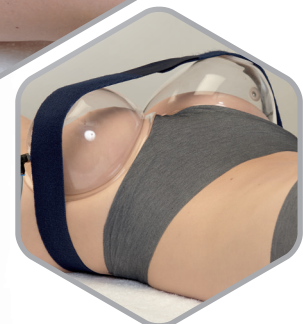

Your client should get the positive attention from friends for sure - and you the recommendation. Because the visible immediate effects are definitely the best advertising for your institute.

SPM 3.0 passed the Ordinance on Protection from Non-Ionising Radiation (NiSV) and fits for all products and depots. Combine it e.g. as pre- or post-treatment with other device applications, such as ultrasound. SPM opens completely new dimensions to you and your customers in the field of cosmetic treatments - good for beauty and business. Because the luxurious experience is not available at every corner - but exclusively in your institute.

Beauty and Business.

With the versatile SPM 3.0 you open new dimensions of cosmetic treatment to you and your customers. Exclusively in your institute.

SPM - a very smart calculation, that works for you, since you won't have to wait long for the first wow-effects. And with growing customer loyalty your investment will quickly change into a profit. Customer for customer, month for month, ...

# HIGH CARE®:

How the original suction pump massage (SPM) becomes even more effective due to our HIGH CARE® product range.

Weyergans  
HIGH CARE®:

Natural ingredients,  
intelligent recipes,  
high concentrations,  
convincing results.

Weyergans HIGH CARE® products combine all of our knowledge about the compositions, concentrations and modes of action for a more effective skin care\*. After 30 years of research and development we can say: HIGH CARE® suits every skin type and spends optimum protection and care.

### THREE STEPS TO BETTER SKIN

Especially in sensitive areas such as stomach, legs and bottom HIGH CARE® products can regulate the structural cell breakdown, inflammatory reactions and oxidative stress well. In combination with the SPM, this care series is a holistic type of connective tissue tightening. Three HIGH CARE® products ensure surprising results.

### LYMPH DRAINAGE WITH HIGH CARE® STYLER CREAM

To get a firm connective tissue the body's own lymph needs to flow. Only then metabolic residues („waste products“) which are responsible for cellulite can be drained. Thanks to HIGH CARE® STYLER CREAM the SPM has a more gentle but also stronger effect at the same time. To make the lymph „flow“ don't forget to recommend the cream also for the cosmetic routine at home. Simply apply with gentle pressure in the direction of lymph flow from the ankles up to the groin.

### FAT BURNING WITH HIGH CARE® AE STICK

After the activation of the skin by the SPM, HIGH CARE® AE STICK can unfold its special effect. Applied to the problem areas, the stick takes care of an even better fat burning and for a blooming of the skin due to spontaneous tightening effects. To support the SPM the stick can also easily be applied between two appointments by the customer - then it is like a cure for the skin.

### CONNECTIVE TISSUE FIRMING WITH HIGH CARE® ALPHA MOUSSE

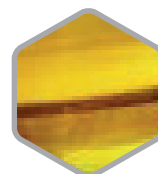

The exclusive mousse is both an impressive solitary care product but also a real booster for our suction pump massage. The recipe from the phytocomplex **Gelidium Cartilagineum\*\***, caffeine for an improved blood circulation, vascular-strengthening escin, urea as a moisturizer and allantoin for the rebuilding of the skin, makes it to a true high tech product. It is also innovative because of its protectability against the storage of hormones in the connective tissue. This is how a softening of the skin (e.g. by taking the contraceptive pill) can be prevented.

The elegant texture of our HIGH CARE® ALPHA MOUSSE is easy to spread, absorbs quickly and does not stick. Including an extra touch of luxury. The mousse was created for an uncomplicated treatment of skin irregularities suitable for the whole body. Due to the intelligent active ingredient complex you can achieve impressive instant effects as well as a lasting harmonic complexion.

The differentiated cellulite treatment preserves and supports the SPM effect even more. But HIGH CARE® products are also a highly effective cosmetic series without the apparatus pretreatment. Even though they are simply enough for use at home, Weyergans recommends the application of the products, because of the special and highly concentrated composition, only under supervision of the cosmetic institute.

\* E.g.: nourishing arnica, detoxifying ivy, anti-inflammatory marigold, pain-relieving comfrey, relaxing guayakazulen and antioxidant tocopherol.

\*\* Asian pennywort, carnitine, aminoacid, horsetail, guarana seeds.
