

IONO-JET 2.0:  
Innovative Plasma  
Dermaceuticals plus  
Active Ingredient  
Cosmetics

# PLASMA POWER FOR THE SKIN

# THE WEYERGAN'S PATH

The Iono-Jet 2.0 is an intelligent combination of different technologies. The result really goes 'under the skin'. And transports energetically negatively charged oxygen and concentrated plant-based active ingredients.

## How we became what we are: HIGH CARE® Professionals

For over 30 years Weyergans stands for inventiveness in the field of medical cosmetics. Whether devices, products or their often combined application - many therapies were found by Weyergans and are still exclusive to this day. Since the founding of the company, innovations from Weyergans are characterized by its practice and customer-orientation and a continuous improvement in terms of functionality and user-friendliness. HIGH CARE® through high tech.

Particularly innovative operators\* of cosmetic institutes are focusing on our dynamic family business right from the beginning. That brings us - as a matter of course as beauty technicians - to our second hallmark which is the Weyergans family.

That doesn't include only those whose name is Weyergans, but especially who lives Weyergans: our employees, distributors, partners, suppliers, users and customers. Going the Weyergans path to respect and benefit from the diversity and the knowledge of all members of this family. This leads to the creative atmosphere for solutions which help to alleviate the suffering of many people who are burdened by skin damages.

### GUT BOISDORF: A PLACE FULL OF ENERGY

The source of inspiration: Gut Boisdorf near Dueren. The historic property is family home and company headquarters, research, and training center in one. This is where nature and modernity combine to form an unmistakable spirit and a timeless corporate identity.

It is our compass even in times of generation change and digitization. Through them we can be relevant as a brand - regardless of any developments and trends. Weyergans has a deeper effect. We not only help people to find back their beauty. The successful healing of the skin is closely related to the successful over-coming of a suffering of the soul. And that is our actual, holistic goal.

# IONO-JET 2.0:

With our new plasma jet technology, negative oxygen ions and active ingredients get to where beauty is created. Under the skin!

With the second generation of the Iono-Jet system, you can offer your customers numerous dermatological applications which feel more intense than ever before. And this technology is completely painless. At the same time, the Iono-Jet 2.0 provides a relaxed skin feeling and quickly visible effects.

## THE NEW IONO-JET 2.0: POWERFUL COMBINATION

With the new Iono-Jet system, you do your customer's skin threefold good.

The Iono-Jet 2.0 combines

- the effect into deeper skin layers by high pressure (painless)
- the energy of negative oxygen ions
- and highly effective concentrates for various skin treatments.

Customers and users can look forward to the Iono-Jet 2.0, which is designed for maximum functionality and ease of use.

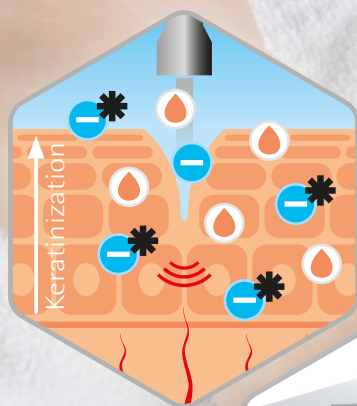

You can effortlessly reach and care for many problem areas targeted, light and handy— especially on the face, neck and hands as well as shoulders and back. Treat age spots on the back of the hands and wrinkling in the décolleté area, back acne or wrinkles around the mouth, nose and eyes.

The Iono-Jet 2.0 aims to deliver negatively ionized oxygen and active ingredients of HIGH CARE® Iono-Jet concentrates to the basal cells. The idea of the Iono-Jet technology is:

- to regulate the acid-base balance,
- to prevent the premature aging of skin cells caused by free radicals,
- to stimulate metabolic processes of the cells such as blood circulation, detoxification, and water retention,
- to support the skin renewal cycle, which slows down with age.

IONO-JET 2.0: With its combination of compressed air jet, negative oxygen ions and valuable concentrates, the Iono-Jet 2.0 can be used flexibly against many skin problems.

Pressure jet: massage and transport system for active substances. Plasma: High density of negative oxygen ions. Concentrates: Everything the skin needs.

3in1: Massage, energy, and care for the entire cycle of skin renewal.

Order is a must: all Weyergans control units are stackable.

After your certification as Iono-Jet Master, you will be able to present and apply the technology convincingly. For this purpose, the matching concentrate ampoule is inserted into the system. When switched on, the control unit builds up the required power. By pressing lightly on the trigger of the Iono-Jet 2.0, the air-concentrate-aero-

sol escapes from the jet. In the process, it is charged with negative oxygen ions by an electrode.

As an Iono-Jet Master, you don't just have the latest technology, but a deeper understanding of skin health. Your clients will appreciate both.

What's going on in your cabin?

Ah and Oh! Even your most demanding customers will be thrilled. From the immediately noticeable and visible results of only one Iono-Jet treatment. The clever thing about

this system: many areas of application mean new sales opportunities.

From the spontaneous refreshing of the skin appearance for special occasions (with only 1-3 sessions) to the long-term strategy for a fundamentally improved

skin feeling with a long-lasting effect (with at least 12 applications).

The system is really easy to use, even for beginners. Only its financing is even easier.

Feel free to talk to us!

# HIGH TECH FOR THE SKIN:

Weyergans Iono-Jet,  
2nd Generation:

Micromassage, ionized  
oxygen and concentra-  
tes for the skin.

Beauty professionals know: Age, environment, nutrition and lifestyle have a complex and individually different effect on the skin's appearance. And customers today are more interested and informed about their skin health. So they increasingly want medically and scientifically well thought-out solutions. Most of them are prepared to pay for appropriate treatments to combat skin irritations and unpleasant forms of aging.

#### EXPERIENCE WITH RESULT

With the new generation of Iono-Jet technology from Weyergans, you can satisfy even the most demanding customers. The Iono-Jet 2.0 is the smart alternative to measures that until today seemed to have no alternative. Unlike injections and surgery, the experience of an Iono-Jet application is completely painless. Instead of causing additional stress to the skin, the Iono-Jet 2.0 aims to stimulate the self-healing potential stored in the skin cells.

This way is gentle and effective in one. What your client feels is a relaxing micro-massage. But what she gets at the same moment is an intense stimulation of the lower layer of the skin. The ionized aerosol jet penetrates the skin, carrying with it its precious cargo of energy and high-end active ingredients. By choosing the right Iono-Jet concentrate, this „transport system“ ensures that the skin cells receive a suitable combination of specially developed serums, peptides, vitamins, stem cells and plant substances. The spectrum of positive influences ranges from soothing, anti-inflammatory and detoxifying to refreshing, circulation-enhancing and regenerating.

Especially in the particularly sensitive area of the face, even a first session with the Iono-Jet 2.0 achieves visible and noticeable changes in the skin. An immediate effect can be the reduction of expression

lines (forehead, nasolabial, laughing and upper lip wrinkles).

#### DO THE IONO-JET-MASTER

Thanks to the variety and combinability of Iono-Jet concentrates, you can create highly individualized application plans for each person with very different goals - peeling and whitenings, detox applications and moisturings as well as partial lifts. Of course, the most promising is a complete menu of well-coordinated pre-, main- and post-treatments.

The many concentrates make the Iono-Jet 2.0 a versatile system against all possible manifestations of visibly stressed, neglected or aged skin.

You can find out everything about the treatment options with the concentrates on the separate flyer.

Extra tip: Combine the Iono-Jet program with a suitable HIGH CARE® preparation series. This will help to reinforce and preserve the success of your application. Combine products into packages and interesting discount offers. And turn happy customers into convincing Iono-Jet influencers.

Your institute will also benefit from this. With the Iono-Jet 2.0, you offer your customers an experience and a result. And differentiate yourself twice over the local competition and other, significantly more expensive, treatment methods. With a well-founded training course and a corresponding package of advertising material we help you to position yourself as an Iono-Jet Master. An early payback on your investment in this technology is thus assured.
