

IONO-JET- CONCENTRATES

Ranging from Basic to Intense. Various treatment options based on intelligent combinations of active ingredients.

Concentrated active ingredient cosmetics hold long-term promise.

Through a powerful synergy of active ingredients and enriched oxygen, Iono-Jet concentrates are nebulized and injected into the skin. The seven perfectly matched concentrates can be used to treat skin problems ranging from light to severe, but also offer numerous combination possibilities in the cabin. Whether used individually or as a skin preparation for subsequent active ingredients, the highly dosed Intense Concentrates are still able to deliver more intensive results than ever before. Smallest drug molecules are designed to penetrate deeply into the skin for radiance that lasts.

IONO-JET PEELING

The Iono-Jet Peeling with fermented yeast extract produces amino acids and peptides, which can contribute to cell regeneration. At the same time, dirty particles and dead skin cells are removed. Because of its alcohol content, it dissolves excess sebum. Consequently, Iono-Jet Peeling

is the best method for preparing the skin for subsequent active ingredients.

IONO-JET PEELING INTENSE

The mandelic acid and the azelaic acid (from cereals) clean and exfoliate the skin effectively. Iono-Jet Peeling Intense is developed to target specific exfoliation (peeling) of the skin. As a result of using this perfectly formulated concentrate, healthy keratinocytes will be renewed during the next skin regenerative cycle. As it is particularly gentle yet powerful, it is suitable for all skin types. By activating and exfoliating the skin, even the demanding skin type is optimally prepared for the subsequent active ingredients. Skin which is affected by strong to very strong impurities, large pores, and scarring, appears more balanced and finer. Even inflamed areas are soothed by the synergy between the negative oxygen ions and the intensive serum and brought back to balance.

IONO-JET DETOX

Skin and connective tissues are clarified by algae extracts. The globeflower stem cells are also known for its detoxifying effect and for removing toxic substances from the skin. Therefore Iono-Jet Detox is a standalone

With the powerful synergy of negative oxygen-ions and versatile active ingredients, you can customize the Iono-Jet 2.0 experience even for your most demanding customers.

solution and at the same time a restorative combination concentrate for restless and stressed skin. After the application, the skin appears soothed and balanced. A feeling of tension due to dryness as well as inflammatory processes are supposed to be reduced while cell regeneration is stimulated. Many users describe the feeling afterwards as 'healthy and exceptionally fresh'!

IONO-JET MOISTURISING INTENSE

Natural peptides and glycerine act as a volumising concentrate in the case of disturbed skin moisture levels. The ultra-hydrating concentrate is intended to fill and soothe the wrinkles and feelings of tension caused by dryness due to a lack of moisture. The result is a noticeable improvement in skin elasticity. This SOS moisturiser is ideal for dry, hypersensitive, and irritated skin. The skin is intensely soaked and regenerates from the inside out.

IONO-JET WHITENING

Extraction of garden cress effectively balances skin pigmentation, lightens pigmentary disorders, and prevents the formation of melasma, which is especially caused by exposure to light and sun. The disorders which may be

harmless, such as typical age spots which appear mainly on the hands and décolleté, can also be experienced as extremely disturbing by those who are affected and can be treated by Iono-Jet Whitening. The goal is to achieve an even, balanced complexion.

IONO-JET LIFTING

Brown macroalgae are known for promoting and maintaining collagen. High doses of hyaluronic acid deliver intense moisture and reduce wrinkles. Iono-Jet Lifting concentrate aims to hydrate and plump the skin. The procedure can also treat smile, lip, and frown lines, as well as nasolabial folds. The skin appears relaxed and balanced.

IONO-JET LIFTING INTENSE

With algae extract and corn syrup, demanding skin can appear youthful again. With Iono-Jet Lifting Intense, there is a stronger lifting effect than ever before. The combination of active ingredients in this case is specifically aimed at treating deeper wrinkles. With the intelligent mode of the Iono-Jet 2.0, the skin is said to become firmer and more vital and appear with new elasticity. The effective symbiosis of concentrated oxygen ions and precious active ingredients works like a booster for all skin layers.

ACHIEVING GOALS WITH THE RIGHT TREATMENT:

- Relaxed Aging
