Your cosmetic institute:

The original  
suction pump massage  
for the whole body

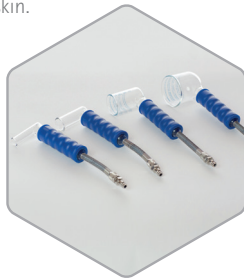

Pamper your skin with the lifting or sculpting of a suction pump massage. Good for body and soul.

Our surveys show: Those who have ever enjoyed a SPM don't want to miss it anymore!

### THE TREATMENT THAT GETS „UNDER THE SKIN“

The original suction pump massage is our further development of a traditional, natural and worldwide recognized procedure. The targeted negative pressure of the SPM also reaches deeper layers of the skin and aims at the circulation in blood vessels and lymph. From now on your beautician doesn't only work on, but with your skin. With its gently controllable power and the versatile SPM suction gun set you can enjoy applications from „fine“ around the eyes to „large areas“ like stomach, legs, and buttocks.

Promote blood circulation, stimulate skin metabolism, and regenerate the whole structure from deeply within? Support fat burning? Everything is possible. Ask your beautician for a SPM – the new standard – against wrinkles on the face and forehead, on the neck and décolleté. SPM can be used even against lachrymal bags, drooping eyelids, couperose and acne-like or scarred skin. For breasts and buttocks there are specially shaped suction cups.

SPM AND HIGH CARE®: FULL EFFECTIVENESS!

Let your beautician show you on your own body what the original suction pump massage can do for you. Convince yourself from the results.

### DIFFERENTIATED CELLULITE TREATMENT (DCT®) WITH HIGH CARE®

HIGH CARE® products can help to alleviate structural cell breakdown, inflammatory reactions and oxidative stress. They are an important element of every DCT®. You can also use them simply and effectively as solitary care products – in your institute or at home.
