THE WEYERGANS PATH

How we became
what we are:
HIGH CARE®
Professionals

Negative oxygen ions stimulate the skin and connective tissue. Because they are absorbed by the skin, they have an immediate effect against acne, psoriasis, hives, burns. They neutralize acids in the stroma and thus support the collagen synthesis.

But how can our skin be supplied with negative oxygen ions? High concentrations exist in the near of waterfalls, hot springs or in the woods.

The Dermionology® from Weyergans provides the skin with plenty of negative ions which are around 1000 to 2000 times above the highest naturally occurring concentrations.

This massive metabolic activation is the core of the systematic connective tissue tightening by Bodyguard.

For over 30 years Weyergans stands for inventiveness in the field of medical cosmetics. Whether devices, products or their often combined

application - many therapies were found by Weyergans and are still exclusive. Since the founding of the company, innovations from Weyergans are characterized by its practice and customer-orientation and a continuous improvement in terms of functionality and user-friendliness. HIGH CARE® through high tech.

Particularly innovative operators of cosmetic institutes are focusing right from the beginning on our dynamic family business. That brings us - as a matter of course as beauty technicians - to our second hallmark which is the Weyergans family. That doesn't include only those whose name is Weyergans, but especially who lives Weyergans: our employees, distributors, partners, suppliers, users and customers. Going the Weyergans path means to respect and benefit from the diversity and the knowledge of all members of this family.

This leads to a creative atmosphere for solutions which help to alleviate the suffering of many people who are burdened by skin damages.

GUT BOISDORF: PLACE FULL OF ENERGY

The source of inspiration: Gut Boisdorf near Dueren. The historic property is family home and company headquarters, research, and training center at the same time. This is where nature and modernity combine to form an unmistakable spirit and a timeless corporate identity. It is our compass even in times of generation change and digitization. That is how we can be relevant as a brand - regardless of any developments and trends.

Weyergans has a deeper effect. We not only help people to find back their beauty. The successful healing of the skin is closely related to the successful overcoming of a suffering of the soul. And this is our actual, holistic goal.

BODYGUARD:

Systematic tightening of the connective tissue with highly active negative oxygen ions and near infrared light

The professional Bodyguard therapy is a central part of the differentiated cellulite treatment (DCT®) from Weyergans. The fascinating effect of this patented process

(patent no. DE 10 2017 008 007 A1) is based on the unique, mutually reinforcing combination of two technologies.

RD
RGANS

Unique combination:
new energy through
highly active negative
oxygen ions plus
stimulation of the
collagen synthesis
through near infrared
light.

On top: the feeling of
deep relaxation for body
and soul.

The treatment is applicable to every beauty couch. During the application your customer is embedded in a synthetic cocoon and the supple plasma consisting of highly active negative oxygen ions flows through it. The individually aligned regulation of the plasma flow can easily and safely be coordinated via the Bodyguard control unit. This also as Dermionology® designated anti-cellulite therapy can be applied depending on skin type and symptoms between 30 and 60 minutes - without any side effects.

WITH A DUAL STRATEGY TO MORE BEAUTY

In the opaque Bodyguard the customer is in perfect hands. The device cover guarantees not just privacy, it additionally functions as a light shower, which irradiates the skin with pleasant near infrared light. While the plasma flow regulates the acid-base balance of the skin, the long-wave infrared light stimulates the collagen synthesis at the same time. The effects potentize one another.

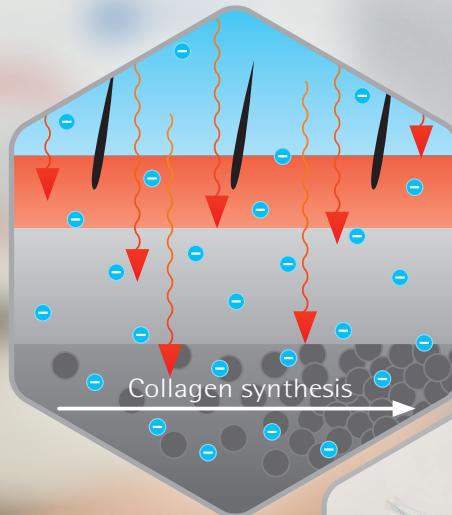

The result for your customer: smoother and firmer skin, a better complexion in the area of the abdomen, legs, buttocks, visibly and noticeably less cellulite and spider veins. Both Dermionology® and also irradiation with near-infrared light are considered as absolutely safe. They are suitable for all skin types.

The result for you: a new highlight for your institute. Enjoy visible treatment success to acquire future customers and improve customer loyalty. More sales without investments in time, space and staff on a regular basis.

Beauty and Business.

With Bodyguard you offer an effective and exclusive treatment option. For you this innovation means a new business with excellent opportunities.

Bodyguard is a smart calculation which is paying off. Because you won't have to wait long for first effects. And with quickly growing customer loyalty an investment becomes profit. Customer for customer, month for month, ...

Natural effect with high tech. Dermionology® and near infrared light treatment unfold their positive effects in different ways. In combination they help stressed skin so regenerate.

HIGH CARE®:

Differentiated cellulite treatment (DCB®) to support your Bodyguard application

Weyergans
HIGH CARE®:

Natural ingredients,
intelligent recipes,
high concentrations,
convincing results.

Weyergans HIGH CARE® products combine all of our knowledge about the compositions, concentrations and modes of action for an effective skin care*. After 30 years of research and development we can say: HIGH CARE® suits every skin type and spends optimum protection and care.

THREE STEPS TO BETTER SKIN

Especially in sensitive areas such as stomach, legs and bottom HIGH CARE® products can regulate the structural cell breakdown, inflammatory reactions and oxidative stress. In combination with the Bodyguard, this care series is a holistic type of connective tissue tightening. Three HIGH CARE® products ensure surprising results.

LYMPH DRAINAGE WITH HIGH CARE® STYLER CREAM

Every effective cellulite therapy starts with a lymphatic drainage. For a tight connective tissue the body's own lymph needs to flow. This is the only way to drain metabolic residues („waste products“) which are mainly responsible for cellulite. To bring the lymph back in „flow“ the application of HIGH CARE® STYLER CREAM should be part of every morning routine. Simply apply the cream with gentle pressure in the direction of the lymphatic flow all the way from the ankles up to the groin.

FAT BURNING WITH HIGH CARE® AE STICK

After the Bodyguard treatment, HIGH CARE® AE STICK unfolds its special effect. Applied to the problem areas, the stick ensures an even better fat burning and an immediate tightening effect. Especially in the beginning the stick should regularly be used between the visits in the cosmetic studio for speedy visible resultst.

CONNECTIVE TISSUE FIRMING WITH HIGH CARE® ALPHA MOUSSE

The exclusive mousse is both an impressive solitary care product but also a real booster for the Bodyguard therapy. The recipe from the phytocomplex *Gelidium Cartilagineum*** , caffeine for an improved blood circulation, vascular-strengthening escin, urea as a moisturizer and allantoin for the rebuilding of the skin, makes it a true high tech product. It is also innovative because of its protectability against the storage of hormones in the connective tissue. This prevents a softening of the skin (e.g. by taking the contraceptive pill).

The elegant texture of our HIGH CARE® ALPHA MOUSSE is easy to spread, absorbs quickly and does not stick. Including an extra touch of luxury. The mousse was created for an uncomplicated treatment of skin irregularities suitable for the whole body. Due to the intelligent active ingredient complex you can achieve impressive instant effects as well as a long lasting harmonic complexion.

The differentiated cellulite treatment preserves and supports the Bodyguard effect even more. But HIGH CARE® products are also a highly effective cosmetic series without the apparatus pretreatment. Even though they are simply enough for home usage, Weyergans recommends the application of the products, because of the special and highly concentrated composition, only under supervision of the cosmetic institute.

* E.g.: nourishing arnica, detoxifying ivy, anti-inflammatory marigold, pain-relieving comfrey, relaxing guayakazulen and antioxidant tocopherol.

** Asian pennywort, carnitine, aminoacid, horsetail, guarana seeds.
