Your cosmetic institute:

Iono-Jet:  
Brings plasma power  
and active ingredients to  
where beauty is created.  
Under the skin.

3in1 strategy for supply, strengthening and renewal of your skin.

The new Iono-Jet:  
 Pressure jet: Massage and transport system for active ingredients.  
 Plasma: High density of negative oxygen ions.  
 Concentrates: Anything your skin needs.

#### IONO-JET: HIGH TECH FOR YOUR SKIN

Age, environment and lifestyle damage the skin on a complex and individually different way. Sensitive areas such as face, décolleté and the back of the hands, but also the neck and shoulder region apparently react „overnight“ with unpleasant signs of premature skin aging. Often the beginning of a race against time.

Thanks to our solution, you can show your skin with confidence again. With the Iono-Jet, your Weyergans beautician now has an instrument by the hand which was developed to help your skin protect itself from external influences from the inside out. After only one session the Iono-Jet shows the great potential of the 3in1 strategy:

- targeted micro-massage of the lower epidermis by high pressure (painless),
- stimulating concentration of negative oxygen ions
- and valuable active substances from the Weyergans High Care® research for various skin treatments such as Peelings and Whitening, Detox applications, Moisturising and Partial liftings.

#### IONO-JET PLUS HIGH CARE®

Weyergans stands for the perfect combination of technical and caring cosmetics. The Iono-Jet is suitable for both single application as well as to enhance other Weyergans products.

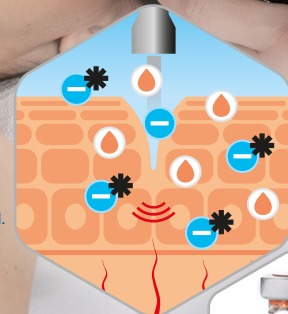

#### IONO-JET: THE GENTLE ALTERNATIVE

Instead of putting additional stress on your skin with injections or surgeries or only to conceal skin damage with pure surface cosmetics, the idea of Iono-Jet technology is to stimulate the self-healing powers of the skin. This "helping nature along" aims on

- the acid-base balance,
- free radicals that cause premature aging of skin cells,
- processes such as blood circulation, detoxification and water retention,
- the slowed down cycle of skin renewal with increasing age.

The experience: An Iono-Jet session is gentle and effective in one. Enjoy a pleasantly relaxing micro-massage while you receive an intensive treatment of the lower skin layer at the same time. The ionized aerosol jet penetrates your skin painlessly. It transports the active substances of a selected Iono-Jet concentrate. These highly specialized preparations can be anti-inflammatory and calming, circulation-enhancing and detoxifying or refreshing and have a regenerating effect on the skin.

The result: Initial tests show that even a single session with the Iono-Jet brings visible and noticeable results. The reduction of expression lines (forehead, nasolabial, laughter and upper lip folds) might be an instant effect. Just want to try it out for yourself? Your Weyergans beautician will be happy to show you how the Iono-Jet can stimulate also your skin.

Micro massage, negative oxygen ions and High Care® active ingredients in the course of skin renewal.
